

5G technology is unsafe, not secure, uninsurable and carries massive liability. We must pause the rollout of this harmful technology.

* Thousands of peer reviewed studies show the harmful effects of wireless radiation on humans and the environment. 5G ramps this up exponentially, yet no safety studies have been done by the telecom industry.

* 5G is being deployed without consent, with 5G antennas every 500 feet and 20K satellites to beam down toxic radiation into our homes, into our bodies. No one can escape or opt-out.

FREE INFORMATIONAL MEETING

The Dangers of 5G and What You Can Do About It

Wednesday, November 20, 6:30pm

Hawaii Vibe Tribe

2197 10th Ave, Honolulu, HI 96816

Debra Greene, PhD

Debra is a research writer, practitioner and public speaker who earned her PhD from Ohio State University. A wellness consultant at Four Seasons Resort Maui, she has been an innovator in health and wellness for over 25 years. Debra founded KeepYourPower.org to educate people about wireless radiation and to organize action for safe technology. She was an invited speaker in the global 5G Summit and has given over a dozen presentations on 5G throughout the islands.
